DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are rejected because it is not clear what the steps of producing photosynthetically an amount of biomass capable of forming biomass coal and harvesting this biomass has to do with the remaining steps in the claims. Clarification is required.

The claims are rejected because the language "capable of " is not positive claim language nor is it a positive recitation of what the biomass does. Applicant states that the biomass is regrown. Applicant has not set forth what constitutes "biomass" nor how it is to be harvested. Clarification is required.

Art Unit: 1714

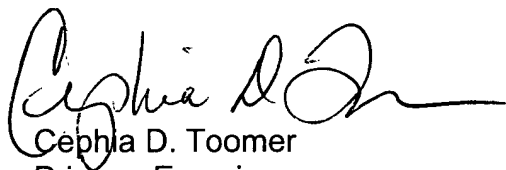

Claims 7, 10, 14, 23, 26 and 30 are rejected because it is not clear how the biomass coal is converted into energy, especially in view of the fact that Applicant's intended use is to store solar energy. Clarification is required.
